CVS Suite 2.5.03 includes Visual Studio 2005 Integration.

19th July 2006: March Hare Software today announced that the immediate availability of CVS Suite 2.5.03 with Microsoft Visual Studio 2005 integration.

"It is now easier than ever to use the software development industries number one version control tool in a Microsoft programming environment", said Arthur Barrett, Product Manager at March Hare. "CVS Suite 2.5.03 is a one stop shop for all the tools you need to effectively implement configuration management."

CVS Suite includes CVSNT that gives software developers the same familiar syntax and reliability as CVS Version Control with innovative features, support for Linux, Unix, Mac OS X and Windows, seamless integration with development environments such as Visual Studio, Eclipse and support for industry best practice in Software Configuration Management.

With the included CVSNT Server, software developers have a tool that increases their productivity and helps them to manage development and delivery of multiple projects. March Hare Software provides support 24 hours a day in UK, Europe, North America and Asia Pacific.
